

GYANENDRA KUMAR PORWAL

Data Analyst

☎ +91-6397325284 ✉ porwalgyanendra36@gmail.com 🔗 [linkedin.com/in/gyanendra-porwal](https://www.linkedin.com/in/gyanendra-porwal) 🐙 github.com/Gyanendra079

Summary

Analytical professional with a strong foundation in SQL, Python, Excel, and Power BI. Skilled in cleaning, analyzing, and visualizing data to generate insights and support data-driven decision-making. Proven ability to conceptualize data flow architectures and deploy actionable business insights in fast-paced environments.

Skills

Programming & Querying: Python, SQL, R, Pandas, NumPy, Statistics

Data Visualization Tools: Advanced MS Excel, Power BI, Tableau, Seaborn, Matplotlib

Analytical Abilities: Data Cleaning, Exploratory Data Analysis (EDA), Predictive Modeling

Tools & IDEs: VS Code, PyCharm, Jupyter, Google Colab, Git, GitHub

Experience

Tutor **March 2026 – Present**

FindMyGuru *Remote*

- Delivering comprehensive instruction to students in Python programming, SQL database management, and foundational analytical concepts.

AI Trainee Engineer **July 2025 – March 2026**

Arcap Reit *Remote*

- Conceptualized on-paper system layouts and data flow architectures for healthcare, manufacturing, and robotics applications rather than live deployments.

Data Science Trainee **Mar 2025 – November 2025**

Unified Mentor and Cognifyz Technologies *Remote*

- Built live projects applying data analysis and machine learning concepts to generate business insights and analyze customer behaviors.

Projects

Tobacco Use and Mortality Analysis | *Python, SQL, flask* **November 2025**

- Processed WHO and CDC datasets utilizing SQL and Python to clean, analyze, and map the relationship between tobacco use and mortality trends.
- Deployed analytical results via an interactive Streamlit dashboard, uncovering and presenting key mortality risk factors for stakeholder review.

Netflix Content Analysis and Recommendation System | *Pandas, Power BI, Scikit-learn* **September 2025**

- Built a content-based recommendation system using TF-IDF Vectorization and Cosine Similarity to suggest similar titles based on genre and cast features, also designed an interactive Power BI dashboard

Climate Change Data Analysis | *Python, Plotly, Pandas* **August 2025**

- Engineered time-series features and standardized diverse climate datasets (NOAA, NASA, FAO) using Pandas to identify CO2 and warming trends.
- Visualized climate indicators and projected multiple emission pathways up to 2100 to support long-term scenario planning and environmental analysis.

Awards & Certifications

- **Advanced Certification in Full Stack Data Science & AI:** IIT Guwahati
- **Machine Learning with AI:** Internshala

Education

B.Tech (Mechanical Engineering) **Graduated: 2017**

BIET Jhansi *Score: 75%*
