PROFESSIONAL SUMMARY

Data Science and AI professional with a B.Tech in Mechanical Engineering and advanced certification in Full Stack Data Science & AI from IIT Guwahati. Experienced in building end-to-end machine learning pipelines, data analysis solutions, NLP systems, and recommendation engines. Skilled in transforming complex datasets into actionable business insights using Python, SQL, and visualization tools. Proven experience working on healthcare analytics, predictive modeling, and large-scale data exploration projects with strong emphasis on explainable AI and data-driven decision making.

TECHNICAL SKILLS

Programming & Data Science

Python, SQL, Pandas, NumPy, Scikit-learn, NLP, Deep Learning

Machine Learning & AI

Regression, Classification, Recommendation Systems, XGBoost, Random Forest, Logistic Regression, Neural Networks, TF-IDF, BERT

Data Visualization & Analytics

Tableau, Power BI, Matplotlib, Seaborn, Excel

Cloud & Deployment

AWS (SageMaker, S3, Lambda, Glue), Docker, REST APIs, Flask

Tools & Development

Git, GitHub, Jupyter Notebook, VS Code, PyCharm, Google Colab

Other Skills

Feature Engineering, Data Cleaning, EDA, Model Explainability (SHAP/LIME), Prompt Engineering

---

PROFESSIONAL EXPERIENCE

AI Engineer Trainee

ARCAP REIT | Jul 2025 – Present

• Designed architecture for an **AI-powered healthcare NLP chatbot** using BERT and Rasa NLU for automated patient support.

• Built theoretical architecture for **hospital readmission prediction system** using XGBoost and AWS SageMaker.

• Designed a **medical image diagnosis pipeline** using deep learning CNN architecture for disease detection.

• Architected **industrial edge AI computer vision solution** using YOLOv8 for automated manufacturing quality control.

Data Science Trainee

Unified Mentor | May 2025 – Nov 2025

• Developed a **content-based recommendation system** using TF-IDF and cosine similarity on large media datasets.

• Built predictive models for **customer satisfaction and mortality risk prediction** using Random Forest, Logistic Regression, and XGBoost.

• Applied SHAP and LIME techniques for **model explainability and feature importance interpretation**.

• Packaged trained models using **Flask APIs for deployment and integration**.

Data Science Trainee

Cognifyz Technologies | Mar 2025 – May 2025

• Conducted exploratory analysis on global restaurant datasets to understand **customer behavior and business performance trends**.

• Engineered features and developed predictive models to improve **restaurant analytics insights and operational decision-making**.

Business Sales Executive

Bandhan Bank, Mumbai | Jul 2024 – Aug 2024

• Managed territory-based customer acquisition and expanded banking account adoption across retail and SME segments.

• Conducted direct outreach and financial product consultations with local businesses to drive account growth.

Data Science Trainee

AlmaBetter | Mar 2022 – Dec 2023

• Built a **retail sales forecasting model** using machine learning on 1,115 Rossmann stores dataset.

• Performed feature engineering and evaluated model performance using RMSE and R^2 metrics.

PROJECT EXPERIENCE

Netflix Recommendation System

Tech: Python, TF-IDF, PostgreSQL, Power BI

• Developed a **content-based recommendation engine** using TF-IDF and cosine similarity.
• Built Power BI dashboards showing **genre popularity, country distribution, and yearly content growth**.

Google Play Store Analytics

Tech: Python, Pandas, Seaborn

• Analyzed **10K+ mobile applications dataset** to identify factors affecting app installs and ratings.
• Performed sentiment analysis on **60K+ user reviews** to evaluate user satisfaction drivers.

Retail Sales Prediction

Tech: Python, Scikit-learn

• Built regression models predicting retail demand across **1,115 store locations**.
• Achieved accurate forecasting using **feature engineering and promotion-based variables**.

COVID-19 Clinical Trials Analysis

Tech: Python, Pandas, Matplotlib

• Analyzed global clinical trial datasets to identify **research activity, sponsors, and geographic trends**.

Tobacco Mortality Risk Prediction

Tech: Python, SQL, Machine Learning

• Developed predictive models analyzing mortality risk related to tobacco usage using WHO datasets.
• Achieved **~85% model accuracy** with XGBoost and Random Forest.

Customer Purchase Behavior Analysis

Tech: Python, Pandas

• Conducted segmentation analysis to identify **high-value customer segments and purchasing patterns**.

CERTIFICATIONS

• Advanced Certification in Full Stack Data Science & AI — IIT Guwahati
• Full Stack Data Science & AI — AlmaBetter

• Machine Learning with AI — Internshala
• Python (Basic) — HackerRank
• AI Tools Certification — Be10X
